THE

HELPKIDZ

COIN

TABLE OF CONTENTS

Introduction

On 1 November 2008, the idea of a cryptocurrency was presented for the first time and on 12 January 2009, the first transaction was carried out with Bitcoin.

Today, cryptocurrencies are seen by many as the answer to traditional finance. This is because digital money does not require banks. The buyers of the coins always retain control and are responsible for the security of the assets. There are now over 3000 cryptocurrencies and transactions with coins have become firmly established.

The HelpKidz Coin offers you many advantages and you do something good at the same time. With each coin you support a charitable cause for the welfare of children. One advantage is that when you sell your HelpKidz Coins, you can make a profit through the increase in value. The principle works similar to the stock market.

Another big advantage with this coin is that the longer you hold your coins in the wallet, the faster the number of your coins increases. Because with each additional buyer you receive 3% more Coins. It is a win-win situation for you: If you keep the coins in your wallet, they will increase in value sooner or later and if you sell them, you will make a profit through the increase in value and you will also be doing something for a good cause!

Mission

HelpKidz Coin is helping their investors to convert parts of their mone.y into Crypto-coins. The exclusive platform enables projects around child welfare. With every purchase of a HelpKidz Coin, users can support the charitable cause.

LIQUIDITY

Every transaction generates liquidity, which is then immediately sent to PancakeSwap, with a 2% contribution from each transaction.

HOW TO BUY HELPKIDZ COIN
